

Monthly Equipment Inspection

Office Operations · Frequency: **Monthly**

UPS & POWER BACKUP

- 1 Test all UPS units — verify battery health and backup duration
- 2 Check UPS event log for any recent faults or alarms
- 3 Confirm auto-shutdown software is active on connected systems
- 4 Record inspection date and findings in Equipment Maintenance Log

CCTV SYSTEM

- 5 Review CCTV footage — confirm all cameras recording clearly
- 6 Check hard disk storage — ensure adequate recording space remaining
- 7 Verify camera angles have not shifted; reposition if required
- 8 Test remote access / mobile viewing if configured

PRINTERS & SCANNERS

- 9 Run test print on all printers — check ink/toner levels
- 10 Clean scanner glass and rollers
- 11 Update printer firmware if update is available

GENERAL IT EQUIPMENT

- 12 Check all workstation power cables and cable management
- 13 Verify router/switch/patch panel are dust-free and ventilated
- 14 Log any equipment requiring repair or replacement
- 15 Report findings to Managing Partner; arrange service if required
